T409SAR

T409SAR

The T409SAR is specifically designed to provide maximum payload under Australian regulations for 19m B-Double and most 19m Quad Dog applications. It also fits the 26m envelope B-Double with 36" sleeper. Reflecting its function as a tough workhorse, the T409SAR features power up to 580 peak horsepower under the classic Kenworth flat grille and hood.

ADR 80/03 - THE NEW AUSTRALIAN EMISSIONS STANDARD

For the T409SAR the emission solution employed to meet ADR 80/03 in the 2011 model range powered by Cummins ISX is cooled Exhaust Gas Recirculation (EGR).

Kenworth is introducing a Cummins Particulate Filter as part of the engine package. The Cummins Particulate Filter, which replaces the existing vehicle muffler, reduces particulate emissions by 90% from ADR80/02 and is designed to last the life of the engine.

Kenworth's application engineering process has delivered an optimized solution that integrates EGR seamlessly across the high horsepower engine options. So as well as being highly efficient and low maintenance the EGR emission solution has little or no impact on payload and efficiency. Kenworth customers get the emission compliance they need with the proven performance and reliability of engines they know and trust – all with the back up of our renowned local design and manufacturing capability and Australia wide support network.

EBSS - ELECTRONIC BRAKE SAFETY SYSTEM

At Kenworth, safety has always been a paramount consideration, and we continue to invest heavily in developing a safer working environment for road transport operators and other road users. All 2011 new model Kenworth's will be available with the latest Kenworth EBSS Safety Package. EBSS incorporates a variety of safety features including ABS, Drag Torque Control, Traction Control and ESP.

Kenworth EBSS has been designed to provide a class leading and reliable system for Australasia's unique road conditions and applications, and deliver better peace of mind for all road users. To learn more about these safety systems visit www.kenworth.com.au

NEW FEATURES

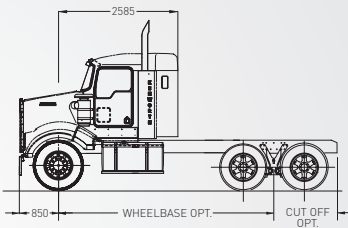

The new T409SAR Kenworth features a wide range of important enhancements- from the significant driver environment improvements to the new trim colours and additional safety features. New doors have been introduced with electric windows as standard, wider more comfortable arm rests, new heavy duty steel key and improved Heater, Ventilation and Air Conditioner Units to keep you warmer in winter and cooler in summer.

The 2011 range also sees the introduction of the new Eaton "Ultrashift plus" automated transmissions. This two-pedal transmission delivers significant improvements in performance, superior acceleration and low speed manoeuvrability with its revolutionary Electronic Clutch Actuation (ECA).
